VARIOJET

The VarioJet Nozzle creates a dynamic, variable water pattern. The nozzle is driven by two Varionaut pumps.

The nozzle generates spray patters from a water bell up to a single stream. These different water patterns are formed by controlling both the Vari-naut pumps individually.

Product characteristics at a glance

- Dynamic and variable water pattern with two Varionaut pumps
- Compact, robust stainless steel Nozzle
- 2 pressure connections
- Nozzle with adjustable flange
- Sea water VarioJet on request

Sold in the US in cooperation with Technifex
