BT 2.2-40 TO BT 22.0-125 IE3

BT block centrifugal pumps are strong, uncomplicated pumps that are used wherever space is limited.

Product characteristics at a glance

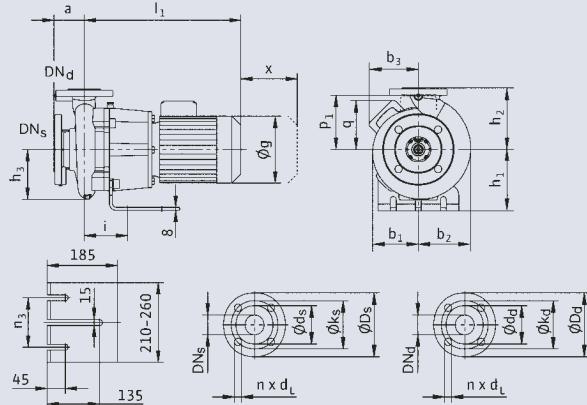

- Dimensions and connections in accordance with DIN standards
- Motor in accordance with new IE3-Technologie
- Maintenance-free slide ring seal
- Enclosed impeller with high efficiency
- Dry installation only
- IP 55 rated

Thanks to their compact design they have very small space requirements. All dimensions and connections are DIN standard; this ensures universal implementation. BT block centrifugal pumps are normal suction centrifugal pumps in spiral housings for dry installation with a motor in accordance with IEC standards. They comprise few parts that are important for their function, which reduces maintenance work to a minimum.

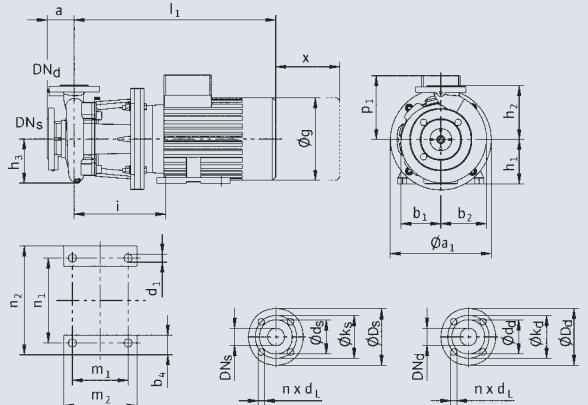

The few maintenance tasks that are necessary are executed quickly and easily. Thanks to the low rpm the pumps are very quiet in operation and are more durable. The enclosed impeller is highly efficient.

The robust BT block centrifugal pumps are delivered as standard in grey cast iron. Upon request these pumps can also be delivered in special materials, such as an impeller as bronze.
